

WaypointCreator

```
graph BT; IdentityWaypointCreator --> WaypointCreator
```

A UML class diagram illustrating inheritance. The class 'WaypointCreator' is at the top, represented by a white rectangle with a black border. Below it is the class 'IdentityWaypointCreator', represented by a gray rectangle with a black border. A solid blue arrow points from the bottom center of 'IdentityWaypointCreator' to the bottom center of 'WaypointCreator', indicating that 'IdentityWaypointCreator' inherits from 'WaypointCreator'.

IdentityWaypointCreator
